The logo for 'Product CENTRAL' features a magnifying glass icon on the left, with the word 'Product' in a light grey font and 'CENTRAL' in a bold, red font to its right, all set against a yellow background.

Product CENTRAL

Compressed gas cylinder

Air Liquide has introduced Minitop, a compressed gas cylinder with an integrated regulator-valve, which is a portable ready-to-use version of its industrial-sized Altop cylinder. Light (10 kg), ergonomic, easy to handle and safe, Minitop is also economical to use. Its solid tulip cap, which is made of highly resistant, non-corrosive composite materials, totally protects the cylinder's regulator-valve at all times. The design of each component also includes exclusive safety features.
