Air Liquide has balloon-grade helium for all occasions: birthdays, valentine's day, parties, festivals, graduations or any other event.

Don't wait, call your nearest Air Liquide location today!

Size matters!

Do you have the optimal cylinder size for your application? Your Air Liquide representative can help you make the right choice and save on cylinder rental!

### How to Choose the Proper Cylinder

Available in different cylinder sizes, Air Liquide's helium for balloons is easy and convenient to use.

Size	Selling Volume	Number of balloons filled per cylinder*					
		25 cm (10")	30 cm (12")	36 cm (14")	41 cm (16")	76 cm (30")	46 cm (18") **
9 <sup>†</sup>	1.21 m <sup>3</sup> (43.64 ft <sup>3</sup> )	155	75	40	25	3	85
11 AL <sup>†</sup>	1.47 m <sup>3</sup> (53.01 ft <sup>3</sup> )	190	93	49	32	3	102
16	2.40 m <sup>3</sup> (86.55 ft <sup>3</sup> )	310	150	80	50	5	165
50	8.10 m <sup>3</sup> (292.11 ft <sup>3</sup> )	1050	520	280	185	19	565

### Your Partner in Safety

We have added a new feature on our larger cylinders (size 50): an innovative ergonomic and protective cap! Now all our balloon helium cylinders have safer caps, making it easier for you to manoeuvre your cylinders safely while protecting the valve at all times.

Before filling your balloons, carefully read the label which is located on the cylinder. Always keep in mind the following safety instructions:

- **Breathing helium can cause anoxia/death. Helium does not support life.** Do not inhale or allow anyone else to inhale helium from the filling equipment, balloons or cylinder, even for a very short period of time.
- Ensure that the safety label is visible at all times.
- Do not allow children to touch or play with the cylinder, valve or balloon filling equipment. Do not leave the cylinder unattended in public.
- Always attach cylinders securely to prevent them from falling.

### Aluminum Cylinder 11 AL

Is portability an issue?

Try our light-weight size 11 aluminum cylinder.

It's lighter and easier to lift than standard cylinders. It's also equipped with a "tulip-shaped" valve protector to guarantee easy access to the valve and provide a convenient carrying handle. Ideal for outdoor events or where safety and manoeuverability are important.

### Accessories

Use one of Air Liquide's balloon fillers on any size cylinder.

To properly secure your cylinders, we suggest you use a wall-mounted securing device or a cylinder cart.
