ALIGAL™ GASES
Preserving taste

 **AIR LIQUIDE**™

ALIGAL™

Convenient and Safe Packaging

Our size 11 aluminum cylinders are lighter and easier to lift. They're equipped with a tulip-cap protecting the valve and providing a convenient carrying handle.

ALIGAL Draft gases:

Less foam. Draws faster. Smoother taste and longer lasting head.

ALIGAL Draft ale

For the widest range of beers. Balancing carbonation for your fine draft beers.

ALIGAL Draft lager

With just that extra touch of CO₂ to give your lager the right head and a faster drawing speed.

ALIGAL Draft stout

Creates that creamier, longer lasting head so characteristic of premium dark beers.

ALIGAL Beverage

ALIGAL is ideal for beverages. Pure CO₂ gas will fizzle up your soft drinks to your customers' delight.

ALIGAL Wine

ALIGAL's pure nitrogen gas for wine tap systems provides a special protective atmosphere. It protects wine from oxidation, preserving the color, quality and taste of keg and bottled wine.

Gas purity

Unlike standard cylinders which can have other uses, our cylinders are dedicated to the beverage service. Pure gas means pure clean pressurization of your beers, wines and soft drinks.

MIXTURE	TYPICAL APPLICATIONS	CGA CONNECTION	SIZE	VOLUME ¹		ITEM NUMBER
				m ³	scf	
ALIGAL Draft ale	Draft ale	580	11AL	1.76	63.47	GAS-ALGALE11
