

## New cylinder offer for welding and cutting

- Air Liquide is proud to introduce a new generation of gas cylinders offering greater safety, ease of use and reduced overall costs.
- Your needs and our know-how have given rise to *ALTOP™*, *SMARTOP™* & *MINITOP™*, a range of innovative valves for Oxygen, Acetylene, Argon and Argon mixtures.
- Ask your Air Liquide representative or visit your local store for more information on our Top product offer.
- These three cylinders meet Department of Transport requirements.
- Calculate the savings a Top product can provide by filling out the savings calculator.

# ALTOP™

# SMARTOP™

# MINITOP™

## Safety

- Shock-absorbing cap
- ON/OFF lever
- No more exposure to high pressure/flow
- Regular maintenance performed at filling plants

## Simplicity

- Easy to handle
- Easy ON/OFF lever
- Ready to use, no loss of time
- Simple regulation of the output flow of argon, or the output pressure of oxygen and acetylene
- Check the cylinder contents at a glance

## Savings

- No more regulator expenses
- Gas savings
- Time savings

## Safety

- ON/OFF lever
- Shock-absorbing cap
- Built-in flow moderator
- A regulator must be connected to the *SMARTOP™* valve (standard CGA connection) before pulling the lever on

## Simplicity

- Easy to handle
- Easy ON/OFF lever
- Check the content at a glance
- *SMARTOP™* also includes a RPV-NRV: residual pressure valve / non-return valve

## Savings

- Gas savings
- Time savings

## Safety

- Cylinder easy-to-carry and handle
- ON/OFF lever
- Integrated regulator fully protected at all times

## Simplicity

- Easy to set
- Easy to connect
- Check the cylinder contents at a glance

## Savings

- *MINITOP™*, a cylinder you own, no more rent or lease
